Situation Overview

- **California State of Emergency Proclamation**

On March 4, 2020, Governor Gavin Newsom declared a State of Emergency for California, as a result of the global COVID-19 outbreak that began in December 2019, to make additional resources available, formalize emergency actions already underway across multiple state agencies and departments, and help the State prepare for broader spread of COVID-19.

- **Global Health Advisory**

On August 6, 2020, in close coordination with the U.S. Centers for Disease Control and Prevention (CDC), the Department of State lifted the Global Level 4 Health Advisory. The Global Advisory, initially put in place on March 19, 2020, advised U.S. citizens to avoid all international travel due to the global impact of COVID-19. For more information visit: <https://www.state.gov>.

- **Executive Order N-33-20**

On August 28, 2020, California introduced a blueprint for reducing COVID-19 in the state with revised criteria for loosening and tightening restrictions on activities by counties. Visit [Blueprint for a Safer Economy](#) for more information and to check the status of a county. This blueprint included a health equity metric to be used along with other metrics to determine a county's tier. The purpose of [Equity Metric](#) is to ensure California reopens its economy safely by reducing disease transmission in all communities.

- **FEMA-4482-DR-CA**

On March 22, 2020, President Trump approved Major Declaration FEMA-4482-DR-CA (DR-4482) for the COVID-19 Pandemic.

* Per MHCC: This data comes from two different reports. One is the actual orders sent to warehouse. This report is where SOC Operations pulled a sample of what entities are being sent PPE. SOC Operations also pulled the number of Tribal orders and PPE amounts from this report. From the second report, SOC Operations pulls the total number of orders in SF and subtracts the total from the day before to get the delta. Total number of orders includes cancelled orders, completed orders, and those orders still in the approval process, which can take up to a few days before going to warehouse; therefore, the delta will most likely never match the number of orders provided in the sample.
